THE LIBRARY OF CONGRESS CATALOGS IN BOOK FORM

PREVIOUS ISSUES

A Catalog of Books Represented by Library of Congress Printed Cards. (Cards issued from August 1898 through July 1942) Ann Arbor, Mich., Edwards, Brothers, Inc., 1942-46. Reprinted by Rowman and Littlefield, Inc., Paterson, N. J. 167 volumes . . . . . $1500 (f.o.b. Paterson, N. J.)

_____ *Supplement.* (Cards issued from August 1942 through December 1947) Ann Arbor, Mich., J. W. Edwards, Inc., 1948. Reprinted by Rowman and Littlefield, Inc., Paterson, N. J. 42 volumes . . . . . $395 (f.o.b. Paterson, N. J.)

The Library of Congress Author Catalog. 1948-1952. Ann Arbor, Mich., J. W. Edwards, Inc., 1953. Reprinted by Rowman and Littlefield, Inc., Paterson, N. J. 24 volumes . . . . . $240 (f.o.b. Paterson, N. J.)

The National Union Catalog, a Cumulative Author List, 1953-1957. Ann Arbor, Mich., 1958. 28 volumes. Reprinted by Rowman and Littlefield, Inc. . . . . $275 (f.o.b. Paterson, N. J.)
(Volume 27: *Music and Phonorecords* and Volume 28: *Motion Pictures and Filmstrips* are also available separately. $20 each plus postage)

The National Union Catalog, a Cumulative Author List, 1958, 1959 . . . . . $260 (plus $3.00 postage)
(This price covers, in addition, the supplementary annuals of *Motion Pictures and Filmstrips* and *Music and Phonorecords*)

Library of Congress Catalog—Books: Subjects, 1950-1954. Ann Arbor, Mich., J. W. Edwards, Inc., 1955. 20 volumes . . . . . $240 (f.o.b. Ann Arbor, Mich.)

Library of Congress Catalog—Books: Subjects, 1955-1959. Rowman and Littlefield, Inc., Paterson, N. J., 1960. 22 volumes . . . . . $247.50 (f.o.b. Paterson, N. J.)

CURRENT ISSUES

The National Union Catalog, a Cumulative Author List, 1960

Monthly issues for January, February, April, May, July, August, October, November, and December, quarterly cumulations for January-March, April-June, July-September and annual cumulation . . . . . $260 (plus $3.00 postage)

The subscription price of $260 for *The National Union Catalog* covers, in addition, the following two parts of *The Library of Congress Catalogs* which are also issued separately and are available at the prices listed. Each part includes its own subject approach.

Library of Congress Catalog—Motion Pictures and Filmstrips
Quarterly issues for January-March, April-June, July-September, and paperbound annual cumulation . . . . . $7.50 (plus 50 cents postage)

Library of Congress Catalog—Music and Phonorecords
Semiannual issue and paperbound annual cumulation . . . . . $4.25 (plus 25 cents postage)

Library of Congress Catalog—Books: Subjects, 1960
Quarterly issues for January-March, April-June, July-September, and annual cumulation . . . $175 (plus $1.50 postage)

SUPPLEMENT

Armed Forces Medical Library Catalog, 1950-1954. (Part one: *Authors;* Part two: *Subjects)* Ann Arbor, Mich., J. W. Edwards, Publisher, Inc., 1955. 6 volumes . . . . . $64 (f.o.b. Ann Arbor, Mich.)

National Library of Medicine Catalog, 1955-1959. (Part one: *Authors;* Part two: *Subjects)* Washington, D. C., Judd & Detweiler, Inc., 1960. 6 volumes . . . . . $60 (f.o.b. Washington, D. C.)

HOW TO ORDER THE CATALOGS

Orders for the catalogs published by J. W. Edwards, Inc., Ann Arbor, Mich.; Judd & Detweiler, Inc., 1500 Eckington Place N. E., Washington 2, D. C., or Rowman and Littlefield, Inc., 128 Oliver Street, Paterson 1, N. J., should be placed with the publishers.

All the other publications are sold by the Card Division, Library of Congress, Washington 25, D. C. Their purchase may be charged against the accounts of subscribers to the card service; others must pay in advance by check or money order made payable to the *Card Division, Library of Congress.*

Payments from foreign countries for these latter publications may be made with UNESCO coupons.

The Library of Congress catalog card for this publication is shown on the last page of this volume

INTRODUCTION

History. The Library of Congress began issuing printed cards for motion pictures and filmstrips in September 1951. These cards represent films currently cataloged by the Library of Congress and by libraries and institutions contributing to its cooperative cataloging program. The cards for films printed in 1951 and 1952 are represented in a special volume of the quinquennial cumulation of *The Library of Congress Author Catalog 1948–1952*. These cards, if they represent a film issued from 1945 on, are also included in the quinquennial cumulation of the *Library of Congress Catalog—Books: Subjects 1950–1954*.

The Library of Congress catalogs in book form were reorganized in January 1953. Since then *Motion Pictures and Filmstrips* (the 1953 issues had the title *Films*) has been published as a special part of the comprehensive *Library of Congress Catalogs*, thereby providing a special tool for this type of material. This cumulation supersedes the four annual cumulations of the *Library of Congress Catalog—Motion Pictures and Filmstrips* for 1953 to 1956, and the quarterly issues for 1957. It is continued and kept current by quarterly issues and annual cumulations.

Purpose. *Motion Pictures and Filmstrips* is designed to reproduce the catalog cards for motion pictures and filmstrips currently printed by the Library of Congress. It constitutes a reference and research tool for a large part of such audio-visual materials. It serves also, by indicating the Library of Congress card number, as a tool for the ordering of Library of Congress printed cards.

Scope. *Motion Pictures and Filmstrips* includes entries for all motion pictures and filmstrips (but not for microfilms) currently cataloged or recataloged on Library of Congress printed catalog cards. The Library of Congress attempts to cover all films of educational or instructive value that are released in the United States or Canada. Data needed for the catalog entries is supplied by film producers or their distributing agencies. United States government films are cataloged through the cooperation of the Visual Education Service of the U. S. Office of Education. In addition, from 1951 through April 1957, cards were printed for virtually all of the published motion pictures and filmstrips which were registered for copyright during that period. Since May 1957 cards have been printed only for those copyrighted films for which data is supplied by the producing agencies.

Entries. A film is entered under its title, followed by the explanatory phrase *Motion picture* or *Filmstrip* enclosed within parentheses. References to the films are provided through added entries appropriate to the normal reference, bibliographic, and service requirements of a general collection of films; for example, from the names of individuals responsible for production, producing companies and distributors, author and title of a published work upon which the film is based or with which it is correlated. In the issues published during the period 1953 through 1957 these added entries were the basis of a name index which has now been discontinued. References from alternative titles or distinctive subtitles of films to the entry under which the film is listed are also included.

Subject Control. A subject index is provided, based on *Subject Headings Used in the Dictionary Catalogs of the Library of Congress*, its cumulative supplements and auxiliary lists, and on the subject authority cards filed in the Official Catalog of the Library of Congress. The principles employed in the construction and application of these headings are, in brief, the use of terms in common American usage in direct form as subject headings and the application of the most specific heading to the material entered.

References from terms which are not used to those which are used (*see* references) and references to more specific subjects or coordinate subjects representing other aspects or closely related matter (*see also* references) are provided.

Form headings have been used to keep certain types of films together and to include each film in the subject index whenever the content of the film did not warrant conventional treatment under specific subject. The most frequently used headings of this type are:

Ballets	Musical shorts
Cartoons	Nursery rhymes
Fairy tales	Short subjects
Juvenile films	Theatrical motion pictures

Asterisks are used in the index to indicate that the title of the film referred to is a filmstrip, or both a motion picture and a filmstrip.

Policy. *Motion Pictures and Filmstrips*, a cooperative publication made possible only by the common interest of its subscribers and the Library of Congress in the development of tools for the aid of the researcher and the general public, will be kept responsive to the needs and suggestions of its users. A continuing effort will be made to cultivate its potentialities and usefulness within the limits of available means.

Inquiries. *Motion Pictures and Filmstrips 1953–1957* was compiled and edited by the Catalog Maintenance Division of the Library of Congress. Questions and suggestions of an editorial nature should be addressed to the Editor of Catalog Publications, Catalog Maintenance Division, Library of Congress, Washington 25, D. C. Orders and business matters should be addressed to J. W. Edwards, Publisher, Inc., Ann Arbor, Michigan.

John W. Cronin
Director, Processing Department

The Library of Congress
Washington 25, D. C.

EXPLANATION OF CERTAIN MARKS AND SYMBOLS USED IN THE ENTRIES

Examples

1. Lathes
I. National Safety Council

Immediately below the physical description and any notes concerning the film are listed the *subjects* with which it deals (preceded by Arabic numerals) and the *names of persons and corporate entities* connected with the film (preceded by Roman numerals). These terms, including Series, are used in preparing headings for cards in film catalogs, and indicate that entries will appear in such catalogs under the name of the series, etc.

649.8

The number in the middle of the last line of an entry is the *Dewey Decimal classification number*, which is assigned for use by film libraries in classifying films by that system. To the end of 1951 these numbers were based on the 14th edition of the *Decimal Classification*. Since January 1952 both the 14th and 15th editions have been used in assigning numbers. If the two numbers are alike except in length, the longer number is given. If the numbers differ other than in length, both are given. In all cases, the number from the 15th edition is preceded by an *asterisk*.

*649.1 649.6

The number assigned to each card for identification, ordering, and stocking purposes appears in the lower right corner of each entry, on the same line as the numbers described above. Cards may be ordered from the Card Division of the Library of Congress by using this *card number*. It consists of a prefix, Fi, followed by two digits of the year the card was first printed, and a serial number. Rev, rev 2, etc., indicate *revision* of the original entry.

Fi 52-2115

rev

Many organizations and institutions participate in the cooperative cataloging program by sending information for the cataloging of certain films to be printed as LC cards. These cards show the symbol Fi A. The name of the *contributing organization* or *institution* appears in the lower left corner of the entry.

Fi A 52-711
British Information Service

Fi E 52-2728
U. S. Office of Education. Visual Education Service.

The U. S. Office of Education prepares the cataloging copy for United States Government films. These cards are issued in the Fi E series, and show U. S. Office of Education, Visual Education Service in the lower left corner.

To locate individual films it is suggested that the producer or distributor indicated in the entry be contacted. U. S. Government films can most easily be located by contacting the Visual Education Service of the U. S. Office of Education.

A

AAA Foundation for Traffic Safety
see American Automobile Association Foundation for Traffic Safety.

The AACS story (*Motion picture*) U. S. Dept. of the Air Force, 1956.
11 min., sd., b&w, 16 mm.
Order no. SFP 870.
Summary: Explains the functions of the Airways and Air Communications Service from its inception in 1908 to the global communications ring that was completed during World War II, and depicts its mission and capabilities today (1956)
1. U. S. Airways and Air Communication Service. 1. U. S. Dept. of the Air Force.
*358.44 Fi E 56-250
U. S. Office of Education. Visual Education Service

The ABC of hand tools, part 1 (*Motion picture*) General Motors Corp., 1946. Made by Walt Disney Studios.
18 min., sd., color, 16 mm.
Technicolor.
Summary: An animated cartoon showing the use and care of hammers, screwdrivers, pliers, and wrenches.
1. Tools. 1. General Motors Corporation.
621.9 Fi A 53-1111
General Motors Corporation

The ABC of hand tools, part 2 (*Motion picture*) General Motors Corp., 1946. Made by Walt Disney Studios.
15 min., sd., color, 16 mm.
Technicolor.
Summary: An animated cartoon showing the use and care of files, saws, chisels, planes, drills, and punches.
1. Tools. 1. General Motors Corporation.
621.9 Fi A 54-27
General Motors Corporation

The ABC of internal combustion (*Motion picture*) General Motors Corp., 1948.
18 min., sd., color, 16 mm.
Technicolor.
Summary: Shows how air, fuel, and ignition work together to create power in the internal combustion engine. Demonstrates how a piston connecting rod, and crankshaft can harness power; illustrates the four-stroke cycle, the valve operation, carburetion, and ignition timing.
1. Gas and oil engines. 1. General Motors Corporation.
621.43 Fi A 53-1114
General Motors Corporation

ABC of jet propulsion (*Motion picture*) General Motors Corp., 1954. Made by Sound Masters.
17 min., sd., color, 16 mm.
Kodachrome.
Summary: Explains, through animation, the basic principles of jet propulsion.
1. Jet propulsion. 1. General Motors Corporation.
621.4 Fi A 54-1018
General Motors Corporation

ABC of puppet making, type one (*Motion picture*) Bailey Films, 1955.
11 min., sd., color, 16 mm.
Revised version of the 1939 motion picture.
With study guide.
Summary: Illustrates procedures in the making and dressing of the simplest type of stringless hand puppet. Stresses the formation of the head, the decorating and painting of the features, and the making of costumes. Emphasizes the use of inexpensive materials.
——— Another issue. b&w.
1. Puppets and puppet-plays. 1. Bailey Films, inc., Hollywood, Calif.
791.5 Fi A 55-547
Bailey Films

ABC of puppet making, type two (*Motion picture*) Bailey Films, 1955.
11 min., sd., color, 16 mm.
Revised version of the 1939 motion picture.
With study guide.
Summary: Shows how to make a puppet head with built-up features, how to hold and manipulate a puppet, and how to create various types of puppet characters. Describes how to build a simple theater, and illustrates the operation by children of several puppet characters in the presentation of a short play.
——— Another issue. b&w.
1. Puppets and puppet-plays. 1. Bailey Films, inc., Hollywood, Calif.
791.5 Fi A 55-548
Bailey Films

ABC of ski (*Motion picture*) Union Pacific Railroad Co. Made by Hughes Sound Films, 1952. Released by Motion Picture Bureau, Union Pacific Railroad Co.
15 min., sd., color, 16 mm.
Summary: The sport of skiing as taught by instructors at a ski school in Sun Valley.
1. Skis and skiing—Pictorial works. 1. Union Pacific Railroad Company.
796.93 Fi A 55-209
Association of American Railroads

The ABC of the automobile engine (*Motion picture*) General Motors Corp., 1948. Made by Sound Masters.
18 min., sd., color, 16 mm.
Summary: Combines cartoon and technical animation to illustrate the component parts of an automobile engine and how they operate. Three basic ingredients (air, fuel, and ignition) that make an engine operate are personified as animated cartoon characters who are shown performing their individual jobs in making the engine run. Explains the function of the carburetor, piston, piston rings and pins, connecting rods, crankshaft, valve mechanism, ignition, cooling and lubricating systems, etc.
1. Automobiles—Motors. 1. General Motors Corporation.
629.25 Fi A 53-1115
General Motors Corporation

ABC of the Diesel engine (*Motion picture*) General Motors Corp., 1950. Made by Sound Masters.
20 min., sd., color, 16 mm.
Summary: Explains how the Diesel engine works. Through animated drawings shows how air and fuel are put into the cylinder and how the mixture is ignited; how the engine can operate without a carburetor; what the two-cycle principle is and how it helps the engine produce power. Includes examples of the application of Diesel engines in industry, transportation, etc.
1. Diesel motor. 1. General Motors Corporation.
621.436 Fi A 53-1116
General Motors Corporation

ABC warfare defense ashore: Biological and chemical decontamination; exteriors (*Motion picture*) U. S. Dept. of the Navy, 1954. Made by Caravel Films.
14 min., sd., b&w, 16 mm.
Summary: Reviews the procedures for treating both gas-contaminated and germ-contaminated outdoor areas, including marked areas, filling decontamination (truck and mixing chemicals, treatment of surfaces, hand spraying with DANC, emergency use of bleach, and checking decontamination results.
——— Another issue. 35 mm.
1. Decontamination (from gases, chemicals, etc.) 1. U. S. Navy Dept. 11. Biological and chemical decontamination; exteriors (Motion picture)
Order no. MN 7984-g 623.3 Fi E 57-44

ABC warfare defense ashore: Biological warfare decontamination; interiors (*Motion picture*) U. S. Dept. of the Navy, 1954. Made by Caravel Films.
6 min., sd., b&w, 16 mm.
Summary: Illustrates the special procedure for decontaminating interiors in biological warfare, including marking suspected buildings, preparation of interiors, and use of decontaminant fog of formaldehyde solution diluted with methanol.
——— Another issue. 35 mm.
1. Decontamination (from gases, chemicals, etc.) 1. U. S. Navy Dept. 11. Biological warfare decontamination; interiors (Motion picture)
Order no. MN 7984-f 623.3 Fi E 57-43
U. S. Office of Education. Visual Education Service

ABC warfare defense ashore: Biological warfare decontamination; personal equipment (*Motion picture*) U. S. Dept. of the Navy, 1954. Made by Caravel Films.
8 min., sd., b&w, 16 mm.
Summary: Describes the decontamination of clothing and personal gear on a large scale with ethylene oxide and carboxide, small scale use of chlorine bleaching solution and decontamination of gas masks and canisters.
——— Another issue. 35 mm.
1. Decontamination (from gases, chemicals, etc.) 1. U. S. Navy Dept. 11. Biological warfare decontamination; personal equipment (Motion picture)
Order no. MN 7984-h 623.3 Fi E 57-45
U. S. Office of Education. Visual Education Service

ABC warfare defense ashore: Biological warfare decontamination; personnel (*Motion picture*) U. S. Dept. of the Navy, 1954. Made by Caravel Films.
10 min., sd., b&w, 16 mm.
Summary: Shows the use of masks and the decontamination facilities of permanent and portable shelters and of outdoor temporary cleansing stations. Details the timetable shower required.
——— Another issue. 35 mm.
1. Gas masks. 2. Decontamination (from gases, chemicals, etc.) 1. U. S. Navy Dept. 11. Biological warfare decontamination; personnel (Motion picture)

Aircraft tires, part 1 (*Filmstrip*) Jam Handy Organization, 1942.
35 fr., b&w, 35 mm. (Aircraft mechanics, no. 15)
Summary: Describes three types of tires (high, medium, and low pressure) and tubes (plain, cactus proof, and safety). Discusses inflation and casing do's and don'ts. Points out the danger to tires of too much heat, cleaning with gasoline or brake fluid, and allowing grease to remain on tire. Explains inspection procedure and what to look for every thirty hours.

21 min., sd., color, 16 mm.
French version released under the title Famille d'Alberta.
Summary: A report on Alberta's expansion in the fields of education, industry, and welfare, told through the story of a rural Alberta family whose lives have been affected by these changes. The young people have left the farm to work in the oil industry, in the educational system, in the city of Calgary, and in the foothill forests covering three-quarters of the Province. The parents, however, remain on the farm. Points out that agriculture is still Alberta's big industry.

Alcohol as a preventative of experimental neuroses (*Motion picture*) Jules H. Masserman and Mary Grier Jacques, 1945. Released by Psychological Cinema Register, Pennsylvania State University.
19 min., sd., b&w, 16 mm.
Summary: Shows that cats, mildly intoxicated with alcohol just before being subjected to motivational conflicts, do not develop markedly neurotic deviations of behavior. When the same conflicts are induced in sober animals severe inhibitions, compulsions, phobias, regressive patterns, and other persistent neurotic aberrations are engendered. Suggests analogies with man's use of alcohol as an anxiety-relieving nepenthic.

All I desire (*Motion picture*) Universal Pictures Co., 1953.
79 min., sd., b&w, 35 mm.
A Universal-International picture.
Based on the novel Stopover, by Carol Brink.
Summary: Illustrates the many uses that meetings and conferences can be made to serve, if guided by a trained and competent leader. Shows how the behavior of people attending meetings is basically affected by the personal concerns they bring with them. Points out that the conference leader can deal successfully with the problem on the table only if he understands how to deal with the people around it. Dramatizes the pitfalls that can beset any meeting and the steps to take in order to avoid them.

The American spirit in architecture (*Filmstrip*) Yale University Press Film Service, 1956.
40 fr., b&w, 35 mm. (The pageant of America filmstrips, no. 25)
With teacher's guide, by William H. Hartley.
Correlated with The pageant of America, edited by R. H. Gabriel.
Summary: Traces the development of American architectural styles. Explains that the early colonists copied the buildings of their native lands; describes how successive builders adopted European styles of architecture and developed new designs as a result of the demands of the country. Describes the contributions which were made to American architecture by Samuel McIntire, Charles Bulfinch, H. H. Richardson, Louis Sullivan, and Frank Lloyd Wright. Captioned photographs and drawings.

U. S. Office of Surgeon General

Anatomy and physiology: The lymphatic system (*Filmstrip*) U. S. Dept. of the Army, 1953.
35 fr., color, 35 mm. and disc: 1 s., 16 in., 33⅓ rpm, 8 min.
Order no. SFS 8-132.
Summary: Describes the anatomy and physiology of the lymphatic system. Discusses the vital importance of tissue fluid which passes into the lymphatics to form lymph. Explains how the lymphatic vessels serve as a drainage system; how the activities of the lymphatic vessels, blood vessels, and various other organs are coordinated; the effect of the skeletal system and breathing upon the lymphatic vessels; and how the lymph nodes defend the body against the spread of infection. For use of Dept. of Defense agencies only.
1. Lymphatics. I. U. S. Dept. of the Army.

U. S. Office of Surgeon General

Anatomy and physiology: The male reproductive system (*Filmstrip*) U. S. Dept. of the Army, 1953.
34 fr., color, 35 mm. and disc: 1 s., 16 in., 33⅓ rpm, 9 min.
Order no. SFS 8-136.
Summary: Explains by means of charts the anatomy and physiology of the human male reproductive system. For medical organizations and allied groups.
1. Reproduction. 2. Generative organs, Male. I. U. S. Dept. of the Army.
Fi E 55-540
U. S. Office of Education. Visual Education Service

Anatomy and physiology: The muscular system (*Filmstrip*) U. S. Dept. of the Army, 1954.
48 fr., color, 35 mm. and disc: 1 s., 16 in., 33⅓ rpm., 11 min.
Order no. SFS 8-129.
Summary: Explains the functioning and structure of the muscular system, including striated or skeletal muscles which control voluntary movement, smooth muscles which control involuntary action, and cardiac muscles which control heart movement; characteristics of contractility and irritability; and tonus in skeletal muscles.
1. Muscles. I. U. S. Dept. of the Army.
612.74 Fi E 55-503
U. S. Office of Education. Visual Education Service

Anatomy and physiology: The respiratory system (*Filmstrip*) U. S. Dept. of the Army, 1953.
46 fr., color, 35 mm. and disc: 1 s., 16 in. 33⅓ rpm, 12 min.
Order no. SFS 8-154.
Summary: Describes the anatomy and physiology of the respiratory system. Explains and illustrates in detail the exchange of oxygen for carbon dioxide through the respiratory system, covering the mechanism and routes governing internal and external respiration. Discusses the action of the diaphragm, the pleura, and the respiratory center in connection with the lungs. Defines the various types of breathing—accelerated (hyperpnea), regular (eupnea), and labored (dyspnea); and the cessation of breathing caused by shock, drowning, or suffocation (apnea) For use of Dept. of Defense agencies only.
1. Respiratory organs. I. U. S. Dept. of the Army.

Angotee; story of an Eskimo boy (*Motion picture*) **National Film Board of Canada, Ottawa, 1953.**
32 min., sd., color, 16 mm.
French version released under the title Angot: l'enfant esquimau.
Summary: An account of an Eskimo boy's life from infancy to maturity. During babyhood he is secure in the protection of his mother; his childhood is free and happy as he plays games invented out of the skills he will need as a man; during adolescence he accompanies his father on the hunt and enters the company of men when he shoots his first seal. The story ends as Angotee leaves the parental igloo to set up his own abode as a family man and a hunter.

Apples, from seedling to market (*Motion picture*) Viking Pictures Corp. Released by Encyclopedia Britannica Films, 1950.
11 min., sd., color, 16 mm.
With teacher's guide.
Summary: Uses the Delicious apple as an example to trace the major steps of apple growing and packing, from planting and grafting stages through shipment of the packaged fruit. Features modern methods of horticulture, including the use of helicopters for dusting the growing trees as protection against insect pests. Illustrates both natural and artificial methods of pollination. Emphasizes the care the trees and fruit receive during all stages of growth. Sequences on packing operations include scenes of washing, sorting, inspecting, wrapping, and packing.

Atmospheric pressure: with the Magdeburg experiment (*Motion picture*) Encyclopædia Britannica Films, 1955.
11 min., sd., b&w, 16 mm.
With film guide.
Summary: Describes contributions of early scientists in the study of vacuums and atmospheric pressure which led to the invention of the air pump and the barometer. A reenactment of Otto von Guericke's Magdeburg hemisphere experiment of 1654 is used to explain that the atmosphere exerts external pressure. Describes the action of an air pump and discusses the properties of a vacuum. Includes scenes of a modern laboratory experiment demonstrating that air has weight. Shows practical applications of knowledge about air pressure and vacuums.
Credits: Production supervisor, Robert Longini; collaborator, Harvey B. Lemon.

The atom and the weather (*Motion picture*) Handel Film Corp., 1955.
13 min., sd., b&w, 16 mm. (The magic of the atom, no. 23)
Produced with the technical assistance of the U. S. Atomic Energy Commission and the Atomic Energy Project at U. C. L. A.
Summary: Describes the relationship of meteorology and atomic energy, explaining how information about the weather helps the men working in atomic energy to protect the public, and how the products of atomic energy help the weatherman. Shows weather installations at various plants of the Atomic Energy Commission. Explains how smoke is used to trace wind currents before radio-active stack gases are released; how radio-active fallout is carefully traced to protect the public; and how radioactivity from atomic tests is used as a research tool by the weatherman. Shows why tests of atomic weapons have no effect on the weather.
Credits: Producer, Leo A. Handel; written by Monroe Manning; narrator, Marvin Miller.

Atomic energy (Filmstrip)
see
The story of the atomic bomb: Atomic energy.

Atomic energy (*Motion picture*) Encyclopædia Britannica Films, 1947.
11 min., sd., b&w, 16 mm. (Chemistry)
With guide.
Summary: Explains by animated drawings the concepts basic to an understanding of atomic energy: identifies parts and structure of atoms; defines and contrasts electronic or chemical energy and nuclear energy; explains the three known forms of atomic energy release—natural radioactivity, nuclear synthesis, and nuclear fission; and illustrates relationship between atomic energy from the sun and chemical energy stored and released in photosynthesis and combustion. For high school, college, and adult groups.
Credits: Collaborator, Willard F. Libby.

Atomic energy for better health, pt. A: Radioactive atoms (*Filmstrip*) Charles Scribner's Sons, 1954.
32 fr., color, 35 mm.
Eastman color.
With teaching guide.
Correlated with Book 8 of The wonderworld of science, by Warren Knox and others.
Summary: Illustrates the structure of simple and complex atoms; explains the difference between the ordinary and radioactive isotope; and shows how radioactive isotopes are made in atomic piles.
Credits: Producer, David J. Goodman; prepared by Morris Meister and Alexander Joseph.
1. Atoms. 2. Isotopes. 1. Knox, Warren William, 1897– The wonderworld of science. Book 8. 11. Scribner, firm, publishers, New York.

Atomic furnaces (*Motion picture*) Handel Film Corp., 1954.
13 min., sd., b&w, 16 mm. (The magic of the atom, no. 2)
Produced with the technical assistance of the U. S. Atomic Energy Commission and the Atomic Energy Project at U. C. L. A.
Summary: Describes nuclear reactors, explaining the principles of their use, and shows several of them in action at Brookhaven, Oak Ridge, and Los Alamos. Shows the first atomic furnace at Chicago, includes cut-away views of a typical reactor, and presents a step-by-step sequence showing the irradiation of materials in the Atomic Energy Commission's water boiler reactor at Los Alamos.
Credits: Producer, Leo A. Handel; written and narrated by Monroe Manning.

The Atomic Kid (*Motion picture*) Republic Pictures Corp., 1954.
86 min., sd., b&w, 35 mm.
Summary: A slapstick comedy about the survivor of an atomic blast in a Nevada test area, whose radioactive condition baffles Government scientists and attracts the interest of a Russian spy.
Credits: Producer, Mickey Rooney; director, Leslie H. Martinson; story, Blake Edwards; screenplay, Benedict Freedman, John Fenton Murray; music, Van Alexander; film editor, Fred Allen. *Cast:* Mickey Rooney, Robert Strauss, Elaine Davis, Bill Goodwin, Whit Bissell.
1. Republic Pictures Corporation.
Fi 55–538

The atomic man (*Motion picture*) Todon Productions, England. Released in the U. S. by Allied Artists Pictures Corp., 1956.
78 min., sd., b&w, 35 mm.
Summary: A crime melodrama. A newspaper reporter and his fiancée help Scotland Yard police to discover the people responsible for the attempted murder of a nuclear scientist.
Credits: Producer, Alec Snowden; director, Ken Hughes; story, Charles Eric Maine; film editor, Geoffrey Robinson. *Cast:* Gene Nelson, Faith Domergue, Lance Maraschal, Roland Brand, Susan Chester.
1. Todon Productions, inc. II. Allied Artists Pictures Corporation.
Fi 56-676

Atomic metallurgy (*Motion picture*) Handel Film Corp., 1955.
13 min., sd., b&w, 16 mm. (The magic of the atom, no. 16)
Produced with the technical assistance of the U. S. Atomic Energy Commission and the Atomic Energy Project at U. C. L. A.
Summary: Explains that materials used in atomic machines must be able to withstand powerful radiation and unprecedented heat. Shows the development, testing, and use of these materials at Knolls Atomic Power Laboratory and at other installations of the Atomic Energy Commission.
Credits: Producer, Leo A. Handel; written by Monroe Manning; narrator, Marvin Miller.

13 min., sd., b&w, 16 mm. (The magic of the atom, no. 10)
Produced with the technical assistance of the U. S. Atomic Energy Commission and the Atomic Energy Project at U. C. L. A.
Summary: Describes the storage and handling of atomic tracers. Demonstrates the use of remote-control tools manipulating radioactive liquids, and explains that the tools are used with safety in hospitals, research laboratories, and by industrial organizations.
Credits: Producer, Leo A. Handel; written and narrated by Monroe Manning.
1. Radioactive tracers. I. Handel Film Corporation, Hollywood, Calif. Series: The magic of the atom (Motion picture) no. 10.
*541.23 Fi 56-192

Atomic radiation (*Motion picture*) Encyclopædia Britannica Films, 1953.
12 min., sd., b&w, 16 mm.
Produced in collaboration with the Division of the Physical Sciences of the University of Chicago, which includes the Institute of Nuclear Studies.
With teacher's guide.
Summary: Explains the fundamentals of atomic radiation. Describes how the French physicist Henri Becquerel discovered the property of radioactivity and how the Curies investigated the three kinds of radiation released by radium. Explains the roles of alpha, beta, gamma, and neutron particles in radioisotope research and shows how natural forms of radiation have been reproduced in the laboratory.

Produced in cooperation with the National College of Education, Evanston, Ill.
With study guide.
Summary: A fourth-grade teacher selects and utilizes audio-visual materials in presenting a classroom unit on conservation. Demonstrates the effectiveness of audio-visual materials in capturing the attention of children and in stimulating them to further study. Shows how a well-organized audio-visual department serves the teacher's needs and describes the duties of an audio-visual coordinator.
Credits: Educational collaborator, Francis W. Noel.

Australia (*Motion picture*) Encyclopædia Britannica Films, 1948.
11 min., sd., b&w, 16 mm.
With teacher's guide.
Summary: Survey of the geographic, economic, and social factors characterizing Australia today. Contrasts urban and industrial concentration in East and Southeast with slower development in the arid central and western areas. Describes Australia's principal exports and imports, and reveals a modern and progressive society maintaining strong economic and social ties with the motherland, Great Britain. For middle grades, high school, and adult groups.

Big enterprise in the competitive system (*Motion picture*) Brookings Institute. Released by Encyclopaedia Britannica Films, 1954.
30 min., sd., color, 16 mm.
Produced with the cooperation of the Maurice and Laura Falk Foundation and the Alfred P. Sloan Foundation.
Summary: Presents three aspects important to a study of the role of big business in a competitive economy, dealing with the questions: How has big business affected the balance of competitive opportunities for risk takers and employees? To what extent has the position of industrial giants become immune from the challenge of competitors? What are the chances of vigorous competition in those industries where a few big companies share the bulk of the output? Also examines the evidence of the growth of big business and whether this growth has been at the expense of the rest of the economy.

Birds that eat fish (*Motion picture*) International Film Bureau, 1953.
6 min., sd., color, 16 mm. (Living science series no. 2)
With teacher's guide.
Summary: Explains how the physical structure of birds is adapted to the kind of food they eat, and points out the characteristics of those that eat fish. Draws attention to the long sharp bill, long toes and legs to support wading birds like the heron, the strong sharp pointed bill of the kingfisher which plunges into water to seize fish in its beak, the strong wings, legs, and talons of the osprey which glides in air then drops into water to seize fish in its talons, the waterproof feathers and the long sharp bill of the cormorant, grebe, and loon, which are excellent swimmers and catch fish underwater in their beaks.

Birds that eat flesh (*Motion picture*) International Film Bureau, 1953.
6 min., sd., color, 16 mm. (Living science series no. 2)
With teacher's guide.
Summary: Explains how the physical structure of birds is adapted to the food they eat, and points out the characteristics of flesh-eating birds which hunt other birds, mammals, and reptiles. Shows members of the hawk family, including the red-tailed, red-shouldered sparrow, and marsh hawks which hunt by day, and calls attention to their strong wings, talons, and sharp hooked bill as common characteristics. Shows night hunters such as the screech, saw whet, barred, and great horned owls which have the sharp hooked bill and powerful large talons of the hawks. Explains that they rely on keen night vision and sensitive hearing to locate prey, and draws attention to the soft downy feathers on wing tips which make flight noiseless as they swoop down on unsuspecting birds, mice, squirrels, rabbits, frogs, and snakes.

Brazil and the Guianas, part 1 (*Filmstrip*) Popular Science Pub. Co. Released by McGraw-Hill Book Co., 1955.
82 fr., color, 35 mm. (Regions and countries of South America)
A Richard Nelson travel strip.
Eastman color.
With teaching guide.
Summary: A survey of Brazil, with emphasis on the Amazon Valley, northern regions, and eastern port areas. Uses captioned photographs, drawings, and maps to show the vast size of the country and to account for the small population in comparison with the United States. Shows how the natives live in the Amazon regions despite the jungle environment, how they subsist largely on cassava and on the game they hunt with blowguns and darts. Shows the animals of the region—peccaries, turtles, alligators, and leopards—and the products of jungle and related areas, including lumber, jute, rubber, Brazil nuts, rotenone insecticide, cotton, tropical fruits and vegetables, and jewels. Visits the ports of Manaos, Belem, and Bahia (São Salvador).

The business of farming (*Motion picture*) National Film Board of Canada, Ottawa, 1945.
20 min., sd., b&w, 16 mm.
Summary: An analysis of Canada's economy from the point of view of the farmer. Explains that the price of manufactured products is determined by operating expenses, rent, taxes, wages, and the cost of raw materials, plus the profit added by manufacturer and retailer, but that the price of farm goods is determined by the current market for food products and not by the amount the farmer needs to cover costs and living expenses. By means of charts shows the relation of farm costs to farm income in Canada in the years from 1926 to 1945. Notes that Government controls have stabilized farm costs, while increasing production continues to raise farm income.
Credits: Producer, Ernest Borneman; director, Dallas Jones; narrator, Bud Knapp; editor, Jacqueline Roach.

Canada (*Filmstrip*) **Life, 1953. Made by Training Films.**
60 fr., b&w, 35 mm.
Based on photographic essays and articles which have appeared in Life magazine.
Summary: Describes how Canada's unlimited waterpower has aided in the exploitation of natural resources; and explains that the extraction of iron, oil, uranium, asbestos, gold, radium, and aluminum has helped to produce an economic boom in Canada. Discusses the importance of the fishing, fur, and lumber industries; shows the development of transportation facilities to the Ungava region where large deposits of iron ore have been discovered; and explains that fertile soil, mild climate, and inland waterways provide ideal farming conditions in Ontario.

Canterbury is a hundred (*Motion picture*) New Zealand Film Unit, Wellington; made 1952.
22 min., sd., color, 16 mm.
Summary: Reviews the progress made during the first hundred years of settlement of Canterbury, a province in the South Island, New Zealand. Begins with a re-enactment of the life of the early English settlers who opened the country and founded the city of Christchurch. A present-century survey shows different aspects of life in Christchurch—its industries, harbor, business and residential areas, and recreation facilities—and of the province's varied agriculture, including sheep raising.

Cape Horn passage to California (*Motion picture*) Tompkins Films, 1951.
27 min., sd., b&w, 16 mm.
Short version released in 35 mm. under title Cape Horn passage.
Based on the book Fifty south to fifty south, by Warwick M. Tompkins.
Summary: Describes the historical background of the Cape Horn sea route and the part played in early American history by the vessels that utilized it. Follows the voyage of the schooner Wander Bird, which sailed from Gloucester, Mass. around Cape Horn to San Francisco in 120 days in 1936–37. Centers around life aboard ship, emphasizing the activities of the Captain's two small children. Includes scenes of the outfitting and operation of the ship; heavy weather off Cape Horn; the use of storm oil; and views of the Horn, sharks, albatross, and seals.
Credits: Producer, Warwick M. Tompkins; narrator, Fred Campbell; animator, Arthur Moore; editor, Carl Pingitore.
